

APICS CSCP (Certified Supply Chain Professional) Course Q&A

Prepared by: Charles A. Busby, CFPIM, CIRM, CSCP
APICS GFTW Instructor

(1) With the class, is the on-line information available for studying and practice testing?
Yes, the Online Learning System is available to each enrolled student for studying and practice testing. (See my notes below.)

(2) Do the students take periodic or module tests?
Students take (or re-take as often as they like) module tests at their own convenience using the Online Learning System.

(3) Do the students take a pre-certification test?
Yes, students can take a Pre-Test using the Online Learning System.

(4) Are these tests performed in class or at home?
These tests are performed at the student's discretion using the Online Learning System. Review questions are also done at the end of each module section in class.

(5) Do you use the available monitoring program to review the students' progress and on-line test results?

Yes, I use the monitoring program to review student progress.

(6) Do you have suggestions for students about additional things they can do to help them prepare for the certification test?

Yes, it is critical that CSCP students read/study the material prior to coming to class sessions. It is also extremely beneficial that they take FULL advantage of the tests, flash cards, and glossary in the Online Learning System, since these are integral part of the CSCP program. I also provide a sample, timed test (which is provided in the instructor's kit) in the last class session to give the students a feel for the actual exam and where they are in preparing.

***Notes:**

CSCP candidates must complete an eligibility application prior to registering for the exam ALL of the CSCP exam questions are taken directly from the course module study guides. The CSCP course is not configured like the CPIM review courses, students MUST read and study the material, PRIOR to coming to class, to get the most out of the instructor led sessions.

Detailed information about the APICS CSCP program can be found at:
<http://www.apics.org/Certification/CSCP>
